EXPERIENCE

PROJECT:

Portfolio

Front-End Development:

- **Designed and Developed:** Created a user-friendly, responsive web page using HTML, CSS, React, and Next.js.
- **Technologies Used:** HTML5, CSS3, React, Next.js.
<https://github.com/Sudipraut1522/Portfolio>

Video Streaming

Front-end Development:

- **Designed and Developed:** Created a user-friendly video streaming platform where users can watch, like, and edit profiles. Ensured an intuitive interface and seamless user experience.
- **API Integration:** Integrated various APIs to enhance the platform's functionality, ensuring smooth and efficient operations.
- **Authentication:** Implemented robust authentication systems for both user and admin portals, ensuring secure access and data protection.
- **Technologies Used:** React.js, TypeScript, Tailwind CSS, TanStack Query.
<https://github.com/Sudipraut1522/summer-project>

Back-end Development:

- **Database Design:** Architected the database schema, including tables for users, videos, likes, and watch history, ensuring efficient data management and retrieval.
- **API Development:** Developed APIs for video uploads, like functionality, view counting, watch history management, and video deletion to support the platform's core features.
- **Video Storage:** Utilized Cloudinary for efficient video storage and management, ensuring fast and reliable access to video content.
- **Technologies Used:** Node.js, Express.js, Postman, Git, GitHub.

Sushimerksem

Front-end Development:

- **Blog and Review System:** Designed and implemented a blog page and review form where customers can read blogs and rate restaurant products, enhancing customer engagement.
- **CRUD Operations:** Conducted CRUD operations using TanStack Query, ensuring seamless data management and updates.
- **Rating Integration:** Integrated a restaurant rating system on the frontend, providing valuable feedback and improving user experience.
- **Review Form Design:** Developed an intuitive review form and implemented secure authentication for the admin portal, ensuring data integrity and security.
- **Technologies Used:** React.js, Next.js, TypeScript, Tailwind CSS, TanStack Query.
